

Protected Area Management Effectiveness

Towards more outcome-oriented protected areas

Release of IMET 2.2 on 25/06

Integrated Management Effectiveness Tool

IMET 2.2 new features

Two additional languages: Spanish and Portuguese, in addition to English and French.

IMET Analysis Report: automatically generated, editable for final analysis and PAME reporting.

Works on any protected area, including those not featured in the WDPA.

User-friendly with automatic information transfer and easier navigation.

Automatic update: no need to download any future version anymore!

Facilitates sharing of assessments with the export / import functionality.

Easier pre-filling of a new IMET from a previous IMET assessment.

...and more
